# CHILD CARE GREEN YARDS BY VERSATILE GRASS

## Versatile Grass BY PROJECT CARPET, INC. TURF SYSTEMS & SOLUTIONS Synthetic - Artificial - Realistic

**Versatile Grass** is a prominent full service supply and install contractor in the Ontario child care industry for synthetic grass play surfaces. **Facility operators are enjoying the consistency and predictability of our high performance turf systems across all weather and seasonal variations.** Our realistic grasses are pleasingly uniform and safe, and a visual and maintenance windfall for Canadian day care centre managers.

***"INSTALL OVERTOP OF CONCRETE OR ASPHALT OR POURED RUBBER, OR DIRECTLY OVER THE EARTH!"***

Our **Versatile Grass Brand** panels are typically 15ft wide and are fully anchored to your playground perimeter to withstand the daily child activities. **All seaming and joining is done with ballistic 'stadium-grade' broad nylon seam tapes using very special all weather tenacious 'pro sport rated' adhesives.** Versatile Grass can be creatively affixed to most existing ground situations or "tired" surfaces, and the makeover gives back a revitalized play area!

***"YOUR CHANCE TO BE CREATIVE! SHARE YOUR UNIQUE LAYOUT IDEAS WITH US AND ALLOW US TO INTERPRET IN GRASS"***

**Versatile Grass** quickly can become the mandatory 2nd or 3rd differential playground surface. Choose from our **eight (8) popular and realistic grass styles for 2009.** Preview each in 'easy-to-understand' close up photography at:

*Structures are required by legislation to meet specific 'fall height criteria' and Versatile Grass has a number of padded grass systems that will meet this testing rigor. Please inquire.*

Have you considered **INDOOR or OUTDOOR GRASS AREA RUGS?** Movable, storable, repositionable. Any size or shape (e.g. a circle!).

Some with 5mm impact foam, and others with a brilliant Velcro seaming flexibility. Functional and unique. Just imagine!
