HYBRID PORTABLE DUAL

\$8.97 sqft

suggested 2009 Canadian retail. Volume courtesies always awarded.

May we bid on your project?

7/8ths
inch
tall

High crimp kinky 'root' nylon bed is engineered to support the polyethylene monofilament 7/8" tall grass blades. 55 ounce face weight, densely tufted, emulates a well-manicured natural grass sports field for ball roll and underfoot playability

OPTIONAL 5mm mill applied performance foam backing; optionally too with Velcro seaming system for maximum portability!

Ask about the Velcro Seam System!

High performing grass where the nylon component gives the same support that a crumb rubber infill would give in a standard 2 inch thick outdoor installation. Rather brilliant concept! A 'tuned' balance of friendliness and robustness, 12 foot wide panels.
